APC Overnight Product Parameters

ND Belt Permitted - Parcels up to 60cm x 60cm x 60cm permitted to be manifested & travel as ND. Please note that our existing ND dimensions still apply, however if the longest dimension reduces to 60cm or under, it allows the 2nd and 3rd dimensions to increase to max 60cm each.

NC sized unboxed items - If an item falls within the NC dimensions but is unboxed, it must be manifested as XS.

Poly Boxes - Can travel on the ND service if they meet the product dimensions and all lids are securely sealed and taped, otherwise these will be considered NC.

Cool Boxes / Blue Cool Boxes – If items contain any liquid they will need to be manifested as LP or LQ (if limited quantities) The fragile ND service must be selected for all other cool boxes. It is vital that the lids are sealed securely to avoid the risk of opening in transit.

Tote Boxes – Can travel on the ND service if the lids are secured with cable ties at both ends. However, if the boxes are not secured, these will be considered NC.

Tyres – current tyre process remains unaffected.

PURS – Will be in scope with all the advised changes effective from 19th October 2020.

LP, LQ, Security and Fragile - will need to be boxed and correctly labelled.

Bagged or products in sacks - within ND or NC dimensions such as animal feed, grains, seeds, or compost will need to be manifested as XS unless they are boxed.

Suitcases / Linen / Sports Bags - These items are unsuitable for our main sorters and will need to be manifested as XS unless any of these items can be boxed.

Auditing - If unboxed items are sent as ND or NC the existing £5 surcharge and auditing process will automatically apply.
